Gold Leaf Gardens / Kokua Services

Gold Leaf Gardens strictly adheres to the strictest organic, living soil cultivation practices. All cultivation methods are compliant with 502 regulations. All inputs are organic and OMRI certified. Organic IPM consists of a variety of modalities to control pest and disease pressures including best practices of cleanliness, environmental controls, robust genetic selection and quarantine protocols.

External modes of intervention include:

- Rosemary Oil
- Organic Neem Oil
- Soybean Oil
- Organic Soap
- Citric Acid
- Beneficial predatory insects
 - Hypoaspis Miles
 - Rove Beetles
 - Nematodes
- Beneficial bacteria and fungus
 - Bacillus Thuringiensis
 - beauveria bassiana
 - Lactobacillus
